# LITERACY INTERVENTION

## When your students fall behind, they keep falling.

As educators know, and research proves, when students fall behind in reading, they tend to keep falling. They also struggle in other courses as well, adversely impacting not only their academics, but their attendance, levels of confidence and engagement. So, it's vital that your lapsed students gain key critical literacy skills. And they need to do so quickly. But the reality of the classroom is that teachers are short on time and resources. Providing the type and amount of intense, personalized instruction necessary to get a struggling reader back on track often isn't feasible, especially for older students.

## But there is a way forward.

**Altis Reach** is an innovative online language and literacy intervention program designed to help struggling readers make meaningful gains quickly. Designed for maximum efficiency, it's authored by some of the leading minds in literacy education and proven effective in schools around the country.

*Reach* was designed to engage your students while delivering the right instruction at the right time, and at the right pace and intensity.

## The Reach approach to efficient learning

Ground-breaking instructional design

Targeted content specific to each student's knowledge gap

Cutting-edge motivational games

Intelligent, adaptive technology

Integrated, embedded assessments

**DRAMATIC GAINS IN LITERACY SKILLS, ACHIEVEMENT AND CONFIDENCE**

## Efficiency is Everything

To accelerate learning and help students close the gap, *Reach* pinpoints your students' specific learning needs. Then, we deliver the most impactful content at just the right time and pace. Embedded assessments allow the program to continually adjust what's being taught and the supports provided so that students stay motivated, challenged and on task. By maximizing efficient learning, your students will make the greatest strides in the shortest amount of time.

# TAILOR-MADE FOR OLDER, STRUGGLING STUDENTS

## Students who have fallen behind need specialized, age-appropriate instruction.

Most remedial reading programs are geared toward younger elementary school students. Struggling older students have their own cognitive gaps, learning styles and emotional needs. *Reach* was created by leading literacy experts to specifically address the complex needs of older struggling readers. To keep students engaged and learning:

- *Reach* delivers real instruction — not just drills — that is tailored to each student based on their skill level.
- The design, media, subject matter, text, music, and games are designed to engage your struggling readers.
- *Reach* is highly relevant to students. The content was developed based on relevance and utility, and also selected from culturally relevant texts so that what students learn will be most impactful and applicable to what they actually encounter in day-to-day life.
- *Reach* uses reward and incentive techniques that are part of popular online games to keep students interested and motivated.

## Powerful reporting tools monitor student progress.

To help your teachers and administrators track your students' success, *Reach* provides detailed reporting of assessment scores, progress and skill development. And when a student gets stuck on a difficult task, your teachers will be automatically notified so they can provide additional support using the tools and techniques contained in the teacher support materials.

Reports can be leveled to your specific need — by student, group, class, teacher, school, district, and even state. That's powerful data in your hands 24/7, whenever you need it — proof positive that you, your teachers, and your students are winning the literacy battle.

**Your students and faculty deserve to have the most sophisticated language and literacy technology at their fingertips so struggling readers can thrive.**

Reach motivated even the most reluctant student! Students were challenged to reach their highest potential and teachers were impressed with the prescriptive functionality of the program. Reach's reporting capabilities provided immediate feedback to both the teacher and student and allowed for more in-depth planning to meet student learning deficiencies."

~ Melissa Starr Wynn,  
Facilitator of Instructional  
Technology, Tyler ISD

# FREQUENTLY ASKED QUESTIONS ABOUT REACH

## What types of students will benefit from *Reach*?

- Older reluctant and struggling readers
- English language learners
- Students with language-based learning deficits

## What grade level is most appropriate for *Reach*?

*Reach* is engaging for students in grades 4-10. The content covers the 1<sup>st</sup> grade to 6<sup>th</sup> grade spectrum, making it ideal for students two or more years behind grade level.

## What content areas are targeted in *Reach*?

*Reach* delivers deep and extensive instruction in phonics, vocabulary, fluency and comprehension.

### Phonics

- Phonics
- Word attack
- Structural analysis
- Spelling
- High frequency words

### Vocabulary

- Vocabulary words
- Morphology
- Tier III words
- Homophones
- Multiple meaning words
- Idioms

### Comprehension

- Asking good questions
- Inferencing
- Prediction
- Summarizing
- Main idea
- Supporting details
- Logic & reasoning
- Description
- Sequence
- Cause & effect
- Compare/contrast

### Fluency

- Rate
- Accuracy
- Prosody
- High frequency phrases

## What hardware or software is required?

*Reach* is a web-based program. All that is required to use the program is a PC or Mac computer with Internet access.

## Is *Reach* easy to use?

The interface is engaging, intuitive and easy to use for both educators and students.

## Does *Reach* offer training or professional development?

Yes. Our team of literacy specialists offers customized professional development to help educators and administrators maximize the effectiveness of *Reach* with their students.
